## **DETAILED ACTION**

### ***Drawings***

New FORMAL drawings are required in this application. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The formal drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for formal drawings will not be held in abeyance.

### ***Allowable Subject Matter***

Claims 1-20 are allowed.

### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: With respect to claims 1 and 11, the prior art fails to teach or render obvious a terminal in a housing for connection to a two wire process loop and a split intrinsic safety barrier comprising current limiters electrically connected between the terminal and the control circuit and a safety barrier electrically connected between the control circuit and the active element. The prior art teaches intrinsic safety barriers used in a level measuring systems. However, none of the prior art either singularly or in combination teaches the claimed system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*

The prior art cited to (Benway et al.; McEwan '161; Diede; Perdue et al.; Klinshetyn; McEwan '059; Mass; Beyer et al.) show various level measuring system using safety barriers and/or power control using two-wire process loop.
